

11. Notes for Chatbot Training Use

This document aggregates publicly available information from Academia International College's official website

(academiacollege.edu.np) and third-party Nepali college directories current as of July 2026. Figures such as "15+

years," "3000+ alumni," and "50+ faculty" are self-reported by the college and should be periodically re-verified

against the live website, since notices, fee structures, faculty lists, and admission deadlines change frequently.

For a production chatbot, this data should be supplemented with: (1) live scraping or an API sync for the

Notices/Events section, (2) the official fee structure (not published in detail on the public site at the time of

writing), (3) full syllabus PDFs linked from each program page, and (4) verified contact routing for admissions vs.

general queries.
